

## E-Commerce ERP Integration | Sana E-Commerce

Looking to improve your [E-commerce ERP integration](#) workflow? Check out these video tutorials that show you how to integrate with its Catalog Management capability.

Integrating an e-commerce platform with an ERP (Enterprise Resource Planning) system is crucial for streamlining business operations and ensuring data consistency. One important aspect of this integration is catalog management, which involves synchronizing product information, inventory levels, pricing, and other relevant data between the e-commerce platform and ERP system.

To help you improve your e-commerce ERP integration workflow, a series of video tutorials have been created to guide you through the process of integrating with the Catalog Management capability of your ERP system. These tutorials provide step-by-step instructions, tips, and best practices for seamless integration.

### Sana Commerce Catalog Management

This [video](#) shows how to manage the catalogue in [Sana Commerce](#).

### Sana Commerce NAV Integration Demo

This [video](#) shows a three-minute demo of how [Sana Commerce](#) is integrated into NAV (Dynamics 365 Business Central).
